The tables show the clearance periods for cheques paid into the various types of accounts on different days. It must be recognised that a cheque could be returned unpaid after it is available for withdrawal. The funds can be recovered from the account until close of business on the day indicated as 'clearance with certainty'. After clearance with certainty, the funds cannot be recovered without the customer's permission unless they are a knowing party to fraud.

**Bank holidays** will extend the clearance period. Remember to add an extra day(s) if there are one or more English bank holidays between the day on which the cheque is paid in and the day indicated for withdrawal / clearance with certainty.
