Therefore, they may require additional advice and support to ensure they understand the information being presented to them and the implications of the arrangement they are entering into to reduce the risk of harm occurring.

We considered the needs, characteristics, and objectives of customers with characteristics of vulnerability at all stages of the design process for this Product to ensure the Product meets their needs.

We have also tested the Product to assess whether it will meet the identified needs, characteristics, and objectives of the target market, including customers in the target market who have characteristics of vulnerability.

We have a business framework to achieve good outcomes for vulnerable customers, which includes:

- Group training to ensure colleagues have the knowledge and skills in relation to identification, treatment and consideration of customer vulnerability.
- Defined processes for tracking, review, contact strategy, desired outcome and data update.

Intermediaries should continue to comply with your obligations to ensure that you treat customers in vulnerable circumstances fairly.
